DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 15 March 2005 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4, 6, 8, and 20-22 are finally rejected under 35 U.S.C. 102(b) as being clearly anticipated by Molnar US006283829B1, as set forth in the Office action mailed 21 December 2004.

Claim Rejections - 35 USC § 103

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 5, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Molnar '829, as set forth in the Office action mailed 21 December 2004.

6. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Molnar '829 in view of Chang et al 2003/0211743 (filed May 7, 2002) , as set forth in the Office action mailed 21 December 2004.

Response to Arguments

7. Applicant's arguments filed 15 March 2005 have been fully considered but they are not persuasive. Applicant argues that '829 deals with fixed abrasive polishing pads, and not slurries with abrasive and solid lubricant particles, and that '829 further does not disclose the amount of lubricant used. The examiner strongly disagrees. Please refer to column 22, lines 64 through column 23, lines 50, that discusses the polishing fluid including abrasive particles, columns 23 lines 51 through column 28, lines 50, for a discussion of the types of lubricants that can be used, including column 28, lines 7-19 for a discussion of the amount of lubricant used "between 0.1 to 15% by weight"; and column 28, lines 50 through column 29, lines 11, for a discussion on how the lubricant is used in both fixed abrasive and abrasive slurry situations. Please refer to MPEP 2123, "Disclosed examples and preferred embodiments do not constitute a teaching away from a broader disclosure or nonpreferred embodiments. In re Susi, 440 F.2d 442, 169 USPQ 423 (CCPA 1971). "A known or obvious composition does not become patentable simply because it has been described as somewhat inferior to some other product for the same use." In re Gurley, 27 F.3d 551, 554, 31 USPQ2d 1130, 1132 (Fed. Cir. 1994)."
